

BYBIT MASTERY

This is only a 3 minute read don't worry, no bullshit, no need to think, no learning.

This won't make you rich or replace your job, this is a side thing to do, which needs **10 minutes a week** of work and **is guaranteed earnings**.

If you haven't registered on **BYBIT** you can make even more.

Before you do anything register first, you can click here: [BYBIT REGISTRATION](#)

Now onto the method.

So first as a new user you can earn **A LOT** by just joining [token splashes](#).

If you're not a new user you can still earn a lot, based on how much work you put in. (easy work just takes time)

Here is the explanation.

Basically new coins before launching (or after) start token splashes where they give out free coins in exchange for trading volume.

Looks like this.

The task is very simple (new users task) :

New User Exclusive:

- 1 **Sign up and register** during 10-25 10:00 – 11-12 08:59 UTC
- 2 **Complete tasks** during 10-29 08:00 – 11-12 08:59 UTC
 - Task 1: **0%** Deposit at least **2000 COOK**
 - OR
 - Task 2: **0%** Deposit **100 USDT** & Trade **100 USDT** of **COOK** on your first Spot trade
- 3 **Earn 400 COOK**

You deposit 100 USDT and then trade 100 USDT, which is basically just buying the coin and then instantly selling it so you don't lose any money, and you get rewarded for simply boosting

trading volume.

Now, you can also farm this.

If you're not a new user or even if you are you also get this task:

The screenshot displays a task interface for a trading competition. It features a vertical progress bar on the left with three steps: 1. 'Login and Register before 11-12 08:59 UTC' (marked as 'Completed'), 2. 'Complete tasks during 10-29 10:00 – 11-12 08:59 UTC' (0% progress), and 3. 'Earn Up to 10000 COOK'. A 'Trade Later' button is visible next to the second step. A green box highlights the task: 'Trade at least 500 USDT worth of COOK on Spot'. A formula at the bottom states: '*Your Final Allocation = (Your Trading Volume/Total Trading Volume of All Participants) * Prize Pool'.

Which is basically just buying the coin and selling the coin over and over to earn more and more.

The more you spam buy and sell the more you earn, depends on you.

On average you can make **\$30-\$40** from a single project.

There are about 10 projects every 2 weeks.

That's **\$600 a month** an hour of work monthly.

Now how to earn money without doing **ANYTHING**

LAUNCHPOOLS

New projects also start launchpools where they reward people for staking their coins for a small period.

Example:

CATS

CATS is a point-collecting game on Telegram. CATS emerged from the growin...

Prize Pool (CATS)
20,000,000,000

APR
1406.30%

Completed

Staking Period 10-08 10:00 ~ 10-15 10:00 UTC

Cats offered a staking period of 1 week with an **APR of 1406.3%**

In a day that's $1406.3\% / 365 = \mathbf{3.85\% \text{ A DAY}}$

And $3.85\% \times 7 = \mathbf{26.95\% \text{ A WEEK}}$

So if you invested \$1000 you would've had **\$1269.5** by the end of the week.

There is always launchpools happening you can expect one every week with an average APR of 800%

So that's 800% profit of your investment at least a year.

Investing \$1000 in every project will make you \$8000

Obviously not everyone can always join the events only if you're early that's why there is a notification button.
