# LAZY DROPSHIPPING

Easy explanation on how to **make a store in 5 minutes.**

Watched **hundreds of videos on dropshipping** and this is the summary of the best tools and how to use them.

This is how much I made already **in the first week**:

Also I recommend watching a tutorial I made, It's 3 minutes long and I explain everything very fast : CLICK HERE

Ok let's start.

First you can register on Shopify and claim your 3 MONTH TRIAL (CLICK HERE)

This is a very good opportunity, to not waste any money and run your store.

Ok after registration, let's find a winning product.

This is the best **FREE** way to find one.
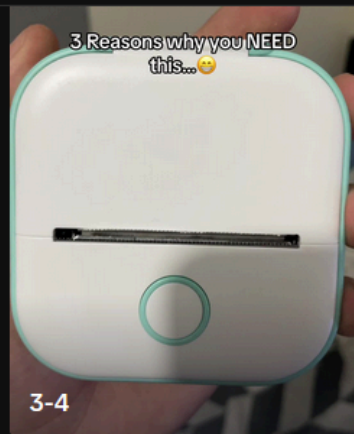

Go to tiktok.com, and search "Tiktok made me buy it"

Search bar: tiktok made me buy it

You will see lots of products, that are probably selling well.

I will choose for example the 5th one you see in the picture.
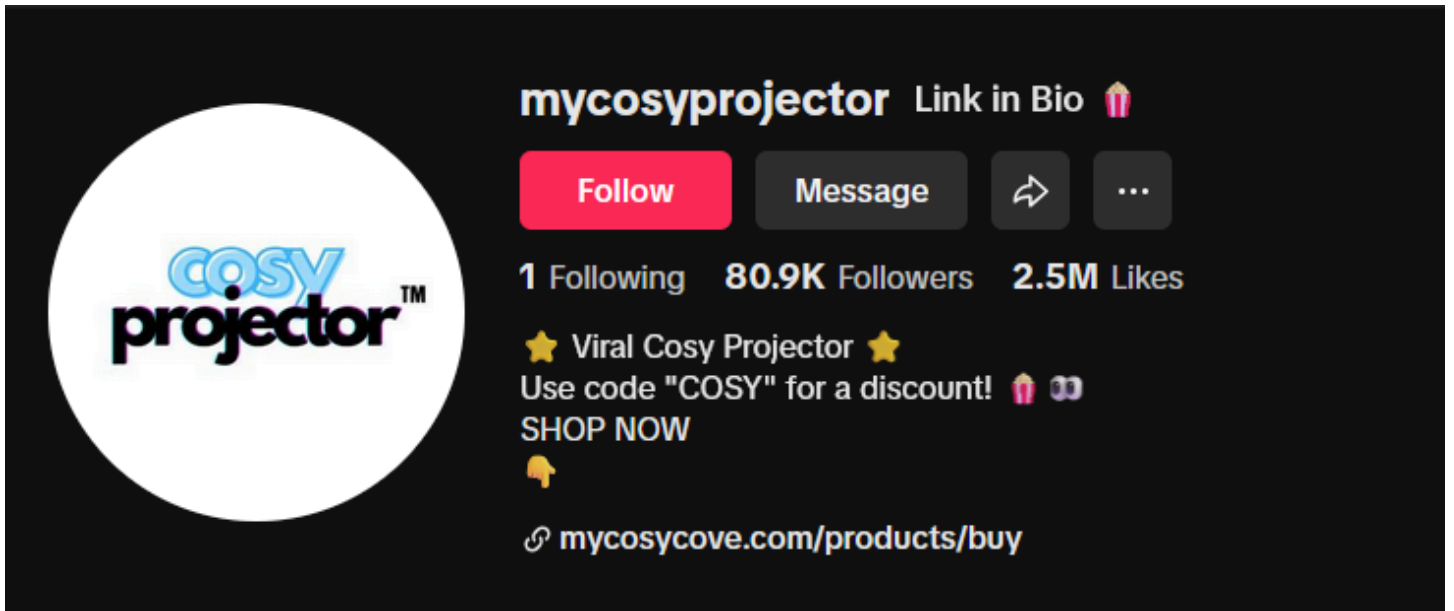

Now let's just go to their store.

Copy the link.

Register on Shophunter : CLICK HERE
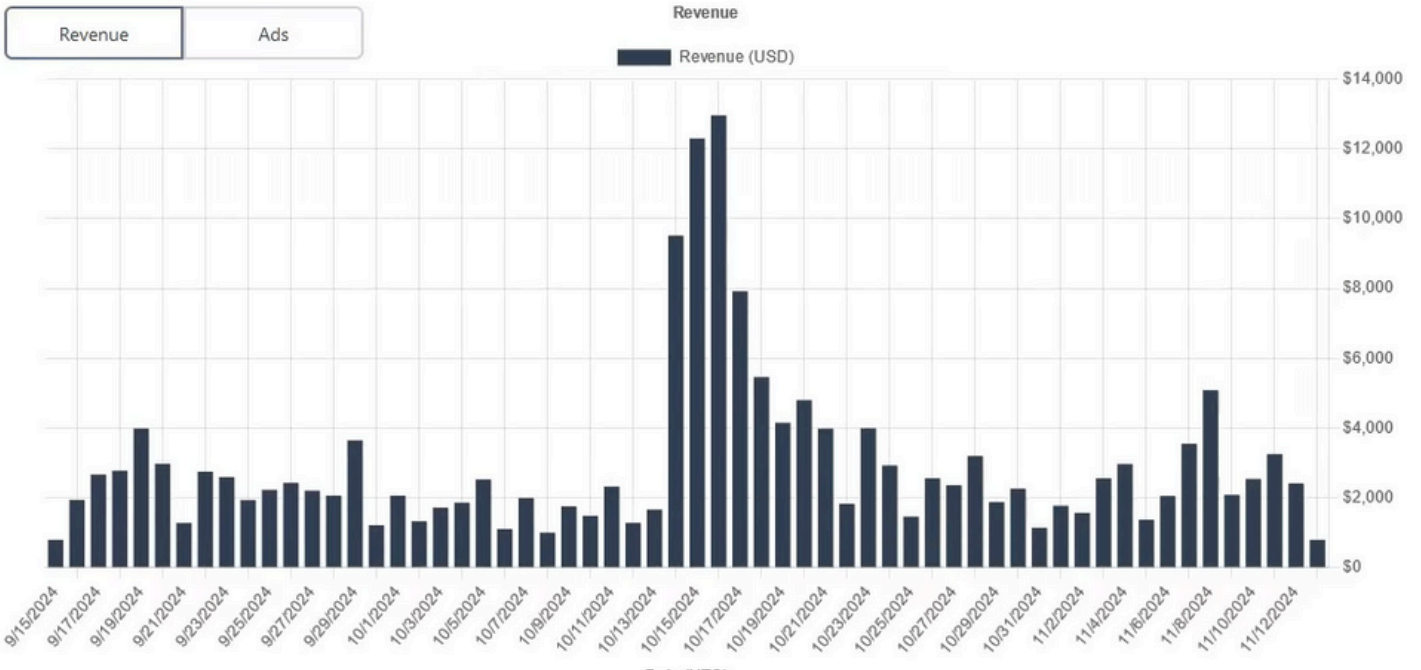

And paste it in (to check the stats of the store)

You should see something like this :

This product made 1,8k in sales in just a day!

That means we can use it.
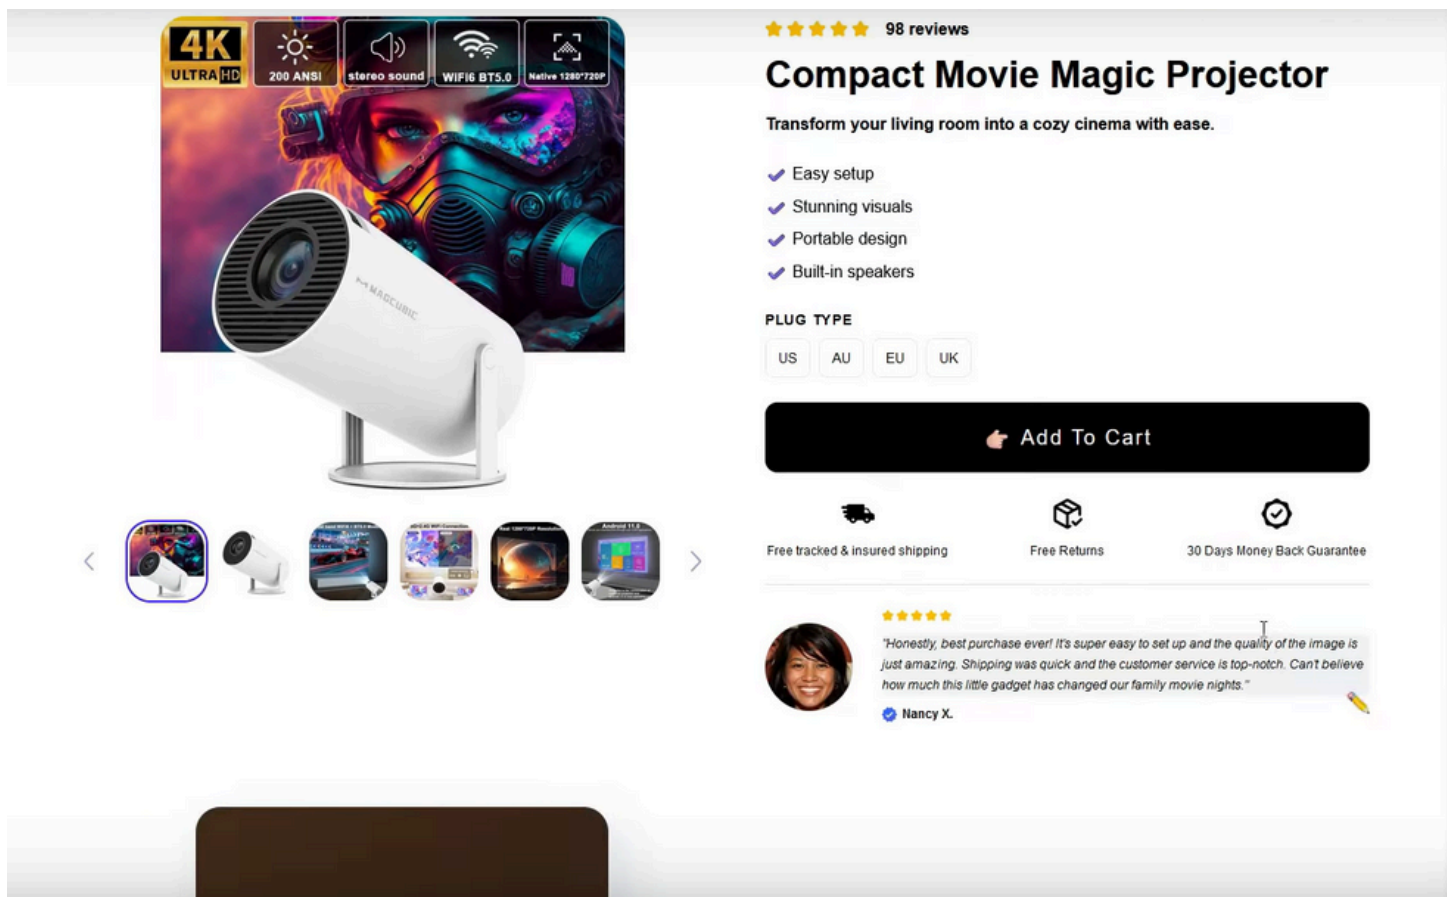

Now how to make a site ?

Don't worry AI exists nowadays.

Register on Pagepilot : CLICK HERE

Click generate, select shopify and just paste in the link of the product

Now within 20 seconds you should receive a full made website for you, which is perfectly optimized for sales!

Don't worry you can change all the texts, but the design is **PERFECT**

Pagepilot also generates ads for you to post on facebook, but It's not always the best.

Best way to do dropshipping is obviously ordering the product and creating a shit ton of content with it.

But if you're lazy **(like me)** you can simply just steal other people's content, change the sound and upload it on instagram.

Simple as that, that way you can post like 10 a day, and trust me.

If you're consistent you will 100% start getting sales in a month at least.

And the rest will be automatic.

Hope y'all enjoyed this.
