Crypto Mastery

This is a 3 minute read, no bs.

Before you do anything, register first here : MEXC EXCHANGE

(with this you will get 5% cashback)

Spot trading fee cashback: 5.00%, Futures trading fee cashback: 5.00%

Ok now onto the explanation.

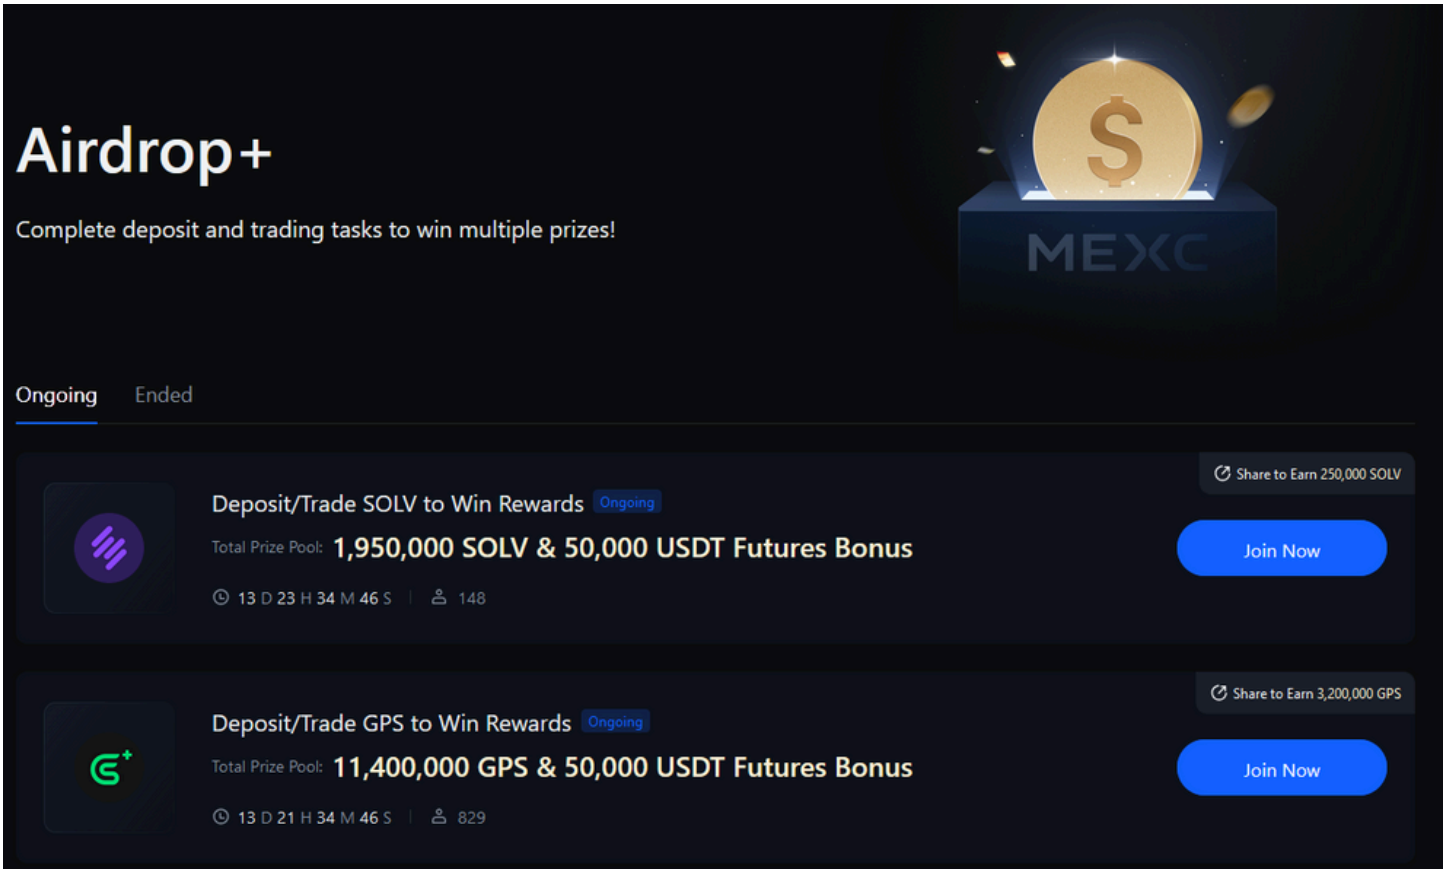
Basically every time a new coin launches, they give away free money in exchange for trading volume.

Trading volume is just trading the coin, not actually spending money.

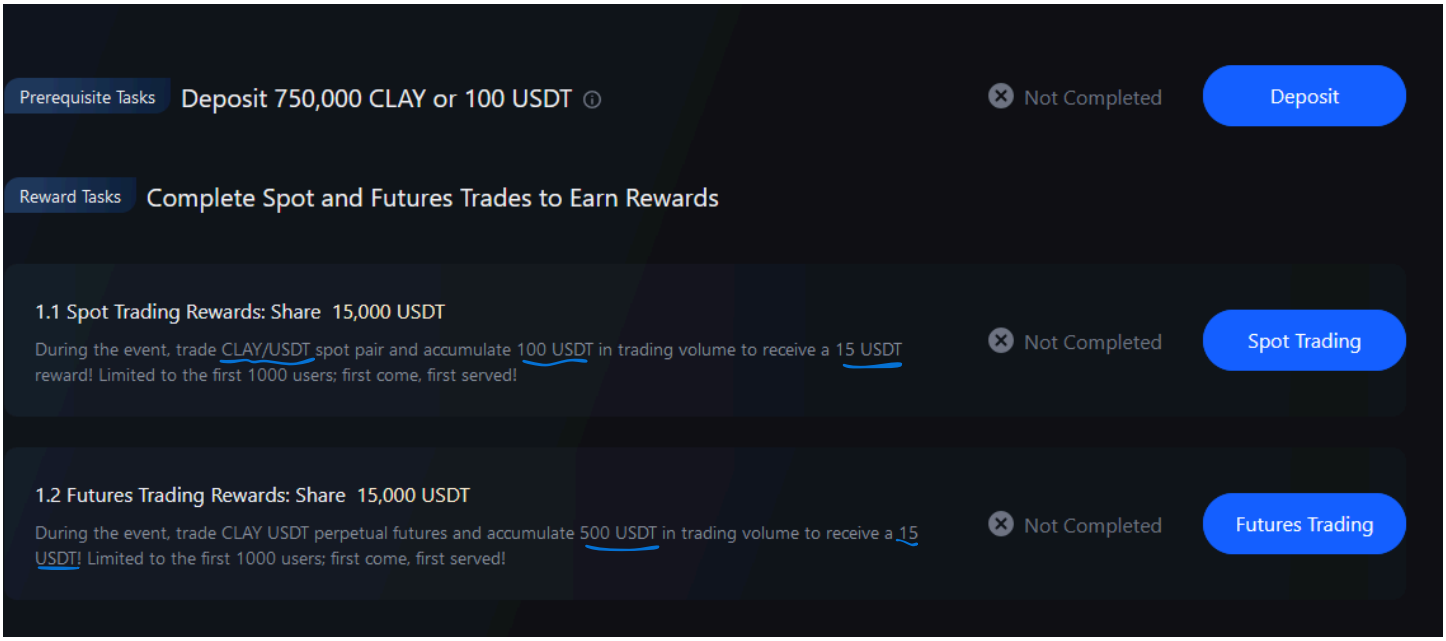
For example if you **buy a coin for $100** and **sell it for $100 you**, you don't lose money but that's **$200 of trading volume**

Now how are we going to abuse this?

Simple.



There are currently 19 events like this, and let me show you how much you can make from each.



Every single event has these same tasks.

1. Deposit 100 USDT
2. Trade 100 USDT on spot and get 15 USDT
3. Trade 500 USDT on futures and get 15 USDT

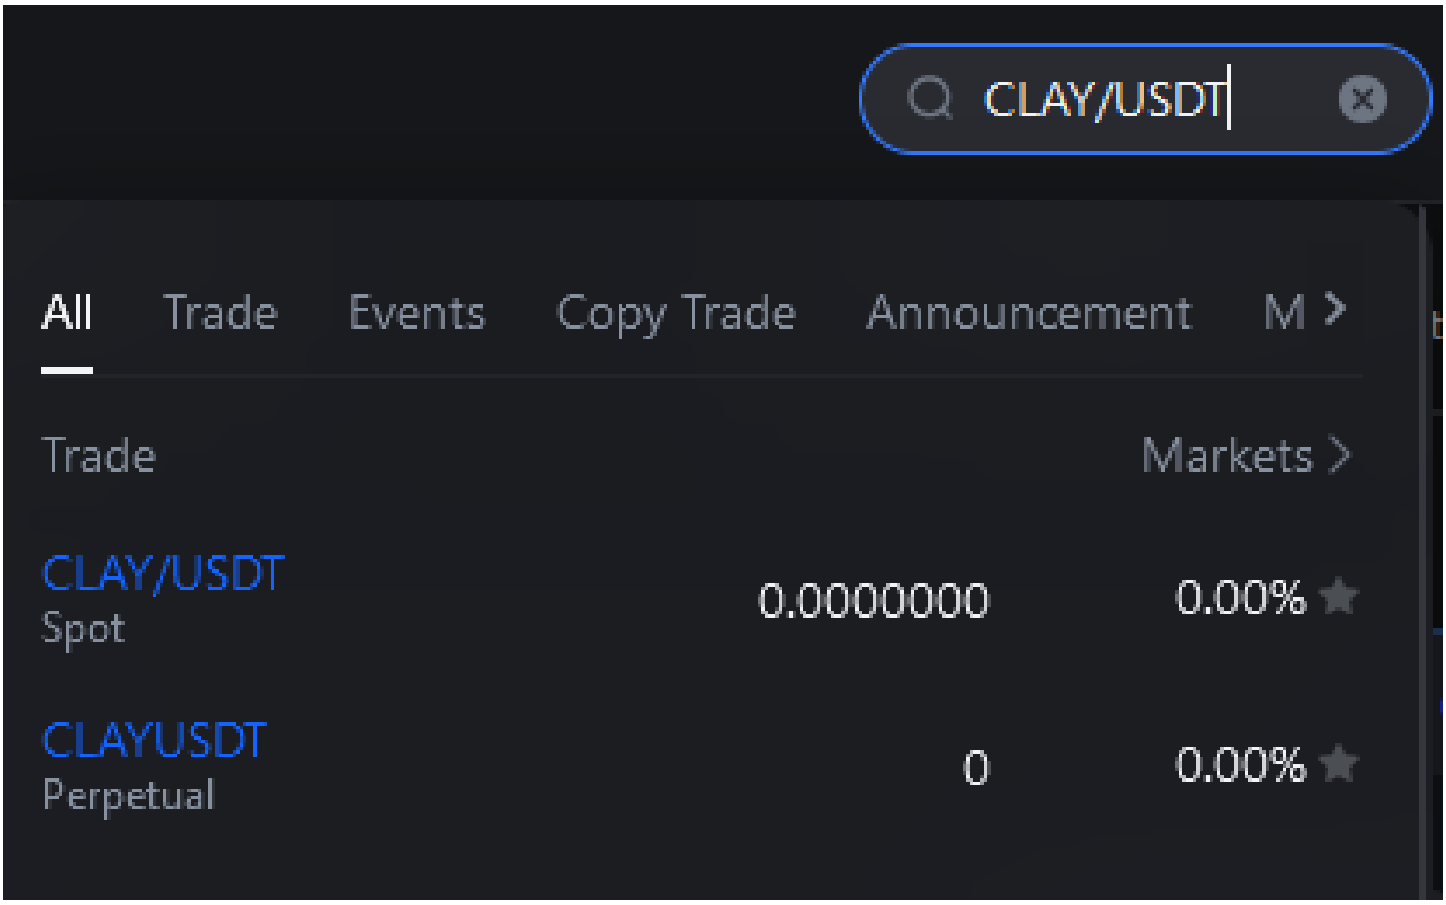
That's guaranteed **30 USDT** per event.

With 19 events currently you will receive **570 USDT**

Now if you have no experience with trading, here is how to do this.

This event that I sent a screenshot of is trading **CLAY/USDT**

You basically just search CLAY/USDT:



And you can see 2 things come up: spot and perpetual

You need to trade 100 USDT on spot

and 500 USDT on perpetual

Don't worry if you deposited 100 USDT, you just need to buy once on spot and instantly sell all of it.

Then go to perpetual and buy and sell 5 times.

And your task is done you can move on to the next event.

Simple as that, doing this on all events will get you **570 USDT**

Also before depositing, register on every single event, because all of them have a task "Deposit 100 USDT"

And with one deposit you will complete the task on all of them.

I hope you understand if you don't, message me on telegram @overdisciplinedd

Every week there are new events, which can print you money.

BONUS TASK

Now every single one of the events also have this task:

Trading more than 20,000 USDT, and you will share a 50,000 USDT prize pool.

Now here is why It's really worth doing it.

There are always about 500-1000 people on these events only, since It's not popular.

Probably only 10% of people actually trade that much of the coins.

Meaning around 70 people only do it, which share the prize pool.

And It's not even hard to do, you just need to **buy and sell with the 100 USDT, 200 times.**

And then after that the more you buy and sell the bigger your award is.

I hope all of you take advantage of this, the earlier you are the better.
